

CHSH Opens Big! UP 27.5%

China Shoe Holdings Inc. (CHSH)
\$0.74 UP 27.5%

News is spreading and investors are jumping. Following the announcement of 1000 new retail outlets being opened, heavy trading pushed shares up 27.5%. News expected tomorrow. Trading will be huge. Get on CHSH first thing Tuesday!

Looks like MS dialed down the fans to keep noise at an acceptable level.

Mine has worked fine for a year and a half.

Online mortgage calculators.

All in all, if these machines were viable, I imagine the system would be safer because as OBBIE points out, it would have to be totally automated.

Score one for those rich, randy ladies there!

a computer piloted vehicle would be the most viable option.

There's lots to say about this that is typical of many beginning LW renderings - particularly about light color.

Telling me when a turn is coming up is awesome.

Take a look at this photo: [www](#).

We like to make fun of our Garmin text-to-speech talker; for example, when it comes up to Forest Drive, it calls it Fo.

flashlight enthusiasts?

My crystal ball says that automated car travel or capsule cars will come sooner.

a computer piloted vehicle would be the most viable option.

I'm sure all the hard working folks at HTC who design for, I don't know, EVERYBODY won't take offense to such a notion.

But, however much being tasty, you eat too much and note!

We're looking for comments that are interesting, substantial or highly amusing.

I don't feel so bad about collecting the crap I'm into anymore.

See a close-up of the box after the jump.

They've been out for awhile now, if you know what to look for you can make sure to buy one of those instead of an older style model.

I would worry a little bit about chlorinated disinfecting agents being routinely applied to the device, but then, honestly, you're gonna rinse.

That top iMac even has wireless power!

If enough people do it, then it would reduce congestion.

You are right, those questions should be asked on Artlantis forums.

Visit FSCO's website: [www](#).

It may have been a cost cutting measure coming to bite them hard in the rear.

This is not a DVD player.
Jump for what you missed.
I mean come on, admit that the thing is a bad build.
Visit FSCO's website: www.
You are right about the energy costs though.
" we hear you cry; well we did pay, with our very own sweat and tears.
I think only Apple is exempt from that limitation.
no rounded corners on an Apple product?
We like to make fun of our Garmin text-to-speech talker; for example, when it comes up to Forest Drive, it calls it Fo.

No shots of Chinese women modeling this product?
Since when has there been an Apple product that has the logo on the bottom-right-back like that?
There is a design issue with it, I think everyone agrees with that.
I agree with harry, what is the purpose of pretending a new computer is coming out?
" we hear you cry; well we did pay, with our very own sweat and tears.
Send me an alert when the A-cup cookies come out for obese men.
It's just a far superior piece of hardware when compared to the XBOX.
It may be like throwing a match into a volcano, but at least they're doing something.
Send me an alert when the A-cup cookies come out for obese men.
They're trying to neutralize their recent screw-ups by evoking the Jetsons; good luck with that, rocket scientists.
My crystal ball says that automated car travel or capsule cars will come sooner.

: "No speakers on this thing Apple has teamed with nations city hospitals to embed bluetooth audio components in skulls.
But everytime I leave a baby in the car, it overheats too.
For chip, the problem persists.
I'm sure all the hard working folks at HTC who design for, I don't know, EVERYBODY won't take offense to such a notion.
One can do much better at fractions of this price.
When I visit my parents, it says: Arriving At mom and fucking dads, on left.
So surprising this occurred in the hottest time of the year.
No shots of Chinese women modeling this product?
The Xbox joke was that it was bigger than most Japanese living room.
BOTI: Hey, sorry dude.
I realised it was supposed to be the power button after I posted, but it only took you three minutes to insult me and four minutes for me to come back to the site.
Iddq is usually clipped at certain fixed value in order to protect from overheating.
I would totally get a pilot's license then.
I am thinking Nobel Prize here.
Hopefully the new sinks take up the slack.
I made the model with the intention to render it in VRay, and modelled it according to this.
So write a comment, polish up your words and choose a username and password below.
They have emergency parachutes for small planes now that deploy when the engines go down or if there's another catastrophic event.
Here's another computer company that makes their stuff in China - Apple.
Then it's a matter of importing a dozen or so boxes, and doing a controlled experiment.
I mean come on, admit that the thing is a bad build.
What's more, if the vents were clogged with dust, the temperature could also increase.
Man that's funny, I'm still laughing.

Pretty easy to notice the bad cloning job on the bottom of the stand in the front and the back.

The technical details would amaze some of you for having only two buttons.

Flying cars will not happen because the FAA won't be able to control it.

Anyway, it must be fake because Apple hasn't had it removed.

Guess which one it is today.

this is obviously a touch screen with iPhone like navigation.

Video games is out of their league.

The price tag is ridiculous.

I suspect it has to do with ambient temperature and where the consoles have been placed.

Your suggestion rendering to a series I couldn't follow.

Will they still be giving away free Nano's with this?

There's only one organization I can think of.

Often people do put bushes and large rocks in strategic places on their property so that it not only looks nice but if a car should go off the road, they will hit these things and slow down.

We all know that the next iMac will have an antigravity hover-stand.

I've gotten varied results in my initial experiments, so I don't know how much to trust a sun study to guide my design.

When needs hit pants as storage.

So surprising this occurred in the hottest time of the year.

Often people do put bushes and large rocks in strategic places on their property so that it not only looks nice but if a car should go off the road, they will hit these things and slow down.

Mapshare is the future baby.

You can choose to design your system at constant power with varying performance, or constant performance with varying power, or combination of the two.

Any luck is for Microsoft.

They have emergency parachutes for small planes now that deploy when the engines go down or if there's another catastrophic event.

Guess which one it is today.

It also has text to speech which is very good.

Just this once; next week bring your ice cream indoors and then load up Gizmodo.

And every time the driver slows down.

See a close-up of the box after the jump.

Hopefully the new sinks take up the slack.

In reality, this Photoshop Genius or Really Bad Photographer claims that this is the new iMac, to be presented tomorrow at Apple's Infinite Loop campus.

Nothing about those bullet points sound good.

There is a design issue with it, I think everyone agrees with that.

All in all, if these machines were viable, I imagine the system would be safer because as OBBIE points out, it would have to be totally automated.

I made this rendering for an article on AC I am preparing at the moment and I am quite impressed with the result!

Would you consider sharing that model?

oh god it's bright, my eyes!

The Xbox joke was that it was bigger than most Japanese living room.

Which run into each other more often, people walking on a sidewalk, or birds flying in the air?

I hope they make that comparison sometime soon.

Glad I pre-ordered bioshock.

When I visit my parents, it says: Arriving At mom and fucking dads, on left.

I don't feel so bad about collecting the crap I'm into anymore.

you say: Subscribe to comments on this post Audition to become a commenter.

Let's just hope Billy can learn from his mistakes - oh wait, precedence tells us he won't!

First one: Failed DVD drive.

It works also for animation?

Remember, you can't stop an airborne vehicle "on a dime".
