

## **CDM Project Development Manager**

YTL-SV Carbon has been formed as an alliance between YTL, the most progressive industrial group in Malaysia on climate change, and SV Carbon, a successful CDM project developer.

YTL SV Carbon strives to be one of the dominating CDM project developers in South East Asia with focus on serving the project developers interests. We are growing the business and seek a highly qualified and dedicated person to join our team in Kuala Lumpur.

The CDM Project Development Manager referring to the Managing Director will have the responsibility on his/her own to develop client relations, PDD and go through the full approval cycle.

### **Qualifications:**

The ideal applicant will possess the following:

- A Master of Science or Engineering (A Bachelor's degree can be considered if the experience is appropriate);
- An in-depth knowledge of the rules and procedures of CDM;
- A strong command of English, both spoken and in writing – other language skills – especially Mandarin - are an asset;
- Three years of working experience with CDM including writing of PDDs;
- Ten years of working experience from environment or energy sector
- Be able to work independently and with a strong sense of quality in the work;
- A committed work attitude, as well as a good sense of humour.

An attractive package of benefits is available for the right candidate. Some travelling will be necessary both in Malaysia and other countries in the region.

More information on the assignment can be obtained from Managing Director Soren Varming +( 6) 019 262 7970.

Interested applicants are requested to write in with curriculum vitae including expected salary, contact telephone number and enclosing a recent photograph by email to [hrad.svc@ytl.com.my](mailto:hrad.svc@ytl.com.my) or by post to :-
